PLENARY SESSIONS—KEYNOTE SPEAKERS

Tuesday, August 30th

Kate Roselle, LPCC

“Addiction in the Family”

When individuals or families come to us for clinical support, it's imperative that we are able to grasp how one impacts the whole. Whether the individual seeking our services is the one struggling with a substance use disorder, or whether they love someone who is, it's our job to facilitate healing. We cannot do that well until we understand how addiction changes everything - for everyone. This presentation will take a deep dive into how addiction impacts a family system, and techniques to help families heal. We will dig into family roles, communication, and recovery for all. You will walk away from this presentation being able to identify if addiction may be present in a family system, how addiction impacts family roles and communication, and will have tangible tools to help families heal and grow, whether or not the individual chooses recovery.

Wednesday, August 31st

Carlo DiClemente, PhD, ABPP

“Addiction and Change: Understanding the Journey of Initiation and Recovery”

This plenary will describe how people change using the stages of change to understand initiation of and recovery from addiction including both substance use disorders and behavioral addictions like pathological gambling. The tasks of the stage can provide a way to understand the journey into and out of addiction and a template for how providers can tailor interventions to tasks of the stages and support the journey through recovery. This presentation will also describe mechanisms of addiction and how to understand and address impaired self-regulation.

Thursday, September 1st

Frances Patterson, PhD, LADAC II, MAC, DAC

“Ethics in the Movies”

Movies and TV programs often include counseling or therapy scenes depicting counselor behaviors with clients. More often than not, the behaviors are ethically questionable. Untrained or unaware viewers may think that these behaviors are acceptable in the professional world. We, as counselors, need to be able to explain to clients why ethically sound practice is not what they see in the media. This plenary session will explore some of these media examples through discussion and thought provoking questions. The NAADAC Code of Ethics will be utilized as a guide to help participants explore their own ethical compass.

“The Journey Together Conference -
Mapping out a Successful Experience”

Attending any conference can be overwhelming! You've read the brochure but still have questions. Possibly, you attended last year and hope this year you get more out of the three and half days. Regardless of how often you've attended, this workshop will help you get the most from your experience. Our goal is to map out the journey from start to finish and make this an awesome experience where you learn and earn credits, make new professional relationships and the seed is planted for you to return every year. Hopefully, you will become a workshop presenter or committee member in the future!

New drugs are appearing on the street and over the counter. During this plenary session, Tommy Farmer will present information and updates on marijuana, high potency THC and THC-P and the difference between Delta variants. He will also discuss current drug trends across Tennessee to include ISOs, Tianeptines and Zaza Red.

Phil Guinsburg and Toby Abrams have been practicing together for 17 years. They share a lot of time in supervision and have a wealth of experience with group process and training.

Join the panel discussion with the professional staff who administer and legally support your state board along with board members. This is an interactive workshop where the panel will provide insight to simplify these administrative and legal topics to strengthen or reinforce your foundation for an ethical and sound practice.

T6 **Kate Roselle, LPCC**
“Boundaries”
Boundary-setting can so often feel like a four-letter word. Why is that? What makes boundaries so difficult to create, set, and maintain? Any dictionary will define 'energy' as 'the strength and vitality required for sustained physical or mental activity'... that's the truest definition, but how does energy apply to counseling. The minute we walk into any room 'our' energy walks in with us, whether it be in a personal or professional setting. This workshop will utilize two different 'energy' activities that can bring a group of colleagues or clients together for the betterment of all.
